AMRENDRA RAJ

BackendEngineer|Python & Node.js | GenAI / RAG Systems

amrraj80855@gmail.com • +916387386717 • linkedin.com/in/amrendraraj leetcode.com/u/amrendraa

PROFILE SUMMARY

Backend Engineer with 3.5+ years of experience in backend development, production support, API validation, and system integration for fintech and enterprise applications. Skilled in Python (FastAPI) and Node.js for building scalable RESTful APIs and GenAI-powered backend services. Hands-on experience with RAG pipelines using pgvector, LLM integrations, MySQL, MongoDB, and developing reliable, high-performance backend systems in Agile environments.

TECHNICAL SKILLS

Languages: Python,JavaScript (ES6+), SQL
Backend & APIs: FastAPI, Node.js, Express.js, RESTful API design, Microservices, Middleware, JWT/OAuth2, RBAC, API Rate Limiting
GenAI / LLM: LLM API Integration (OpenAI, Anthropic), Retrieval-Augmented Generation (RAG), Prompt Engineering, LangChain, pgvector, ChromaDB
Databases: PostgreSQL, MySQL, MongoDB, Sequelize, Mongoose, Data Modeling, Query Optimization
Tools & Practices: Git/GitHub, Postman, Swagger/OpenAPI, Jira, Agile/Scrum
Cloud & Infra (self-directed): Docker, AWS (S3, IAM, RDS), Kafka, Redis, CI/CD basics

Work Experience-

Quality Engineer (Taaaza Tech| PNQTechnologies)

Oct 2025 – Present

GenAI content search: Collaborated on a GenAI-powered semantic search feature for contentfiltration, improving topic discoverability across a large content repository.
Content syndication: Built and validated syndication workflows across 20+ territories using DITA maps, DITA topics, and sitemap structures within Adobe AEM.
API quality: Reviewed API implementations against Swagger/OpenAPI specifications, identifying edge cases and reducing production failure scenarios.
Debugging & data integrity: Partnered with backend developers to troubleshoot service issues, analyze logs, and write SQL queries verifying transactional consistency; contributed to sprint planning and API design discussions.

SoftwareEngineer |CreativeScriptPvtLtd

May 2024 – Sep 2025

Estu — student fintech onboarding platform

Third-party integration: Worked on the onboarding pipeline integrating the Socure KYC SDK and Mbanq banking APIs for student account provisioning; diagnosed recurring SDK onboarding failures from incomplete customer documents and built logic to surface the specific error back to the customer.
Support tooling: Integrated Zendesk helpdesk workflows to triage onboarding issues, and contributed to internal/external wire transfer and wallet functionality, plus related MongoDB/MySQL schema updates.
Documentation: Maintained Swagger API documentation and used Postman for API verification.

Member of Technical Staff |NECCorporation India Pvt Ltd

Sep 2022 – Apr 2024

QT2021(Univerge Blue) — sales quoting platform
Business logic validation: Validated end-to-end quote workflows — creation, import, and generation — across Super User and Normal User permission tiers.
Data integrity: Wrote SQL queries and analyzed application logs to verify data consistency across quote and billing transactions, and collaborated with developers onAPIdesign alignedto Swagger/OpenAPI specs.

PCV (Personalized Cancer Vaccine) — manufacturing tracking system
Pipelineverification: Validated a multi-stage, tracking system covering patient sample intake, blood/tumor report processing, and invoice status through the manufacturing pipeline, with strict access controls around patient records.

PERSONAL PROJECTS

AI-Powered Shopping Assistant

Tech Stack: Python, LangChain, LangGraph, Streamlit, ChatGroq, SQLite

- Developed an AI-powered Shopping Assistant using Python, LangChain, LangGraph, Streamlit, ChatGroq, and SQLite, enabling intelligent product discovery through natural language and image-based search.
- Built a tool-calling AI agent with LangGraph to automate product search, recommendations, order placement, and order tracking through multi-step workflows.
- Integrated Vision Language Models (VLMs) for multimodal AI, enabling image understanding and product identification from uploaded images.
- Designed an SQLite-backed product catalog and implemented prompt engineering, function calling, and structured tool outputs to improve retrieval accuracy and agent reasoning.
- Developed an interactive Streamlit interface, applying LLM application development, agent orchestration, and tool integration to deliver a production-style conversational AI solution.

Certifications

Introduction to Generative AI and Agents -Issued by Microsoft
Introduction to Generative AI - Art of the Possible -Issued by(AWS)
How to use roadmap in Jira -Issued by Coursera
